Participation Review of 2023

Domestic Exhibitor	Overseas Exhibitor	Domestic Buyer	Overseas Buyer
It was a big opportunity to meet many managers from diverse channels. Local enterprises found this exhibition very efficient because we could hold meetings several times rather than wasting our time on full-day business trips. What is more, the interface between the relevant company and the buyer was more optimistic than expected.	I currently started my new business with a brand-new product and experiencing a shortage of market information. By meeting up with other exhibitors during the fair, we could share each other's business experiences and look for improvement points. For me who is going through the learning stage in business, the exhibition itself was very informative and meaningful. Thanks for the opportunity!	The Seoul International Sourcing fair helped me to come up with nice ideas regarding the next year's merchandise design and production line. As there was lots of creative merchandise displayed in the "Goods Store" section, I was able to follow up on the latest market trends. This experience will surely give a hint to my business!	By observing the exhibition items of other booths, I could come up with new ideas and technologies to utilize in my business. I had many burdens to consider and go through, but now I can seek new possibilities shortly thanks to the Sourcing fair.

“Goods Store” is a special exhibition zone that aims to gather companies willing to expose their identities through creative merchandise marketing. Visitors will have access to ESG merchandise, art goods collaborated by popular designers and also project merchandise full of ingenious concepts.

ESG Goods Zone

Main Participants

- Plastic Lab
- 119REO
- New Year Market (Senior Market)
- SUM Korea

Brand Goods Zone

Brand Goods Zone
